

# Recognition-Primed Decision Model

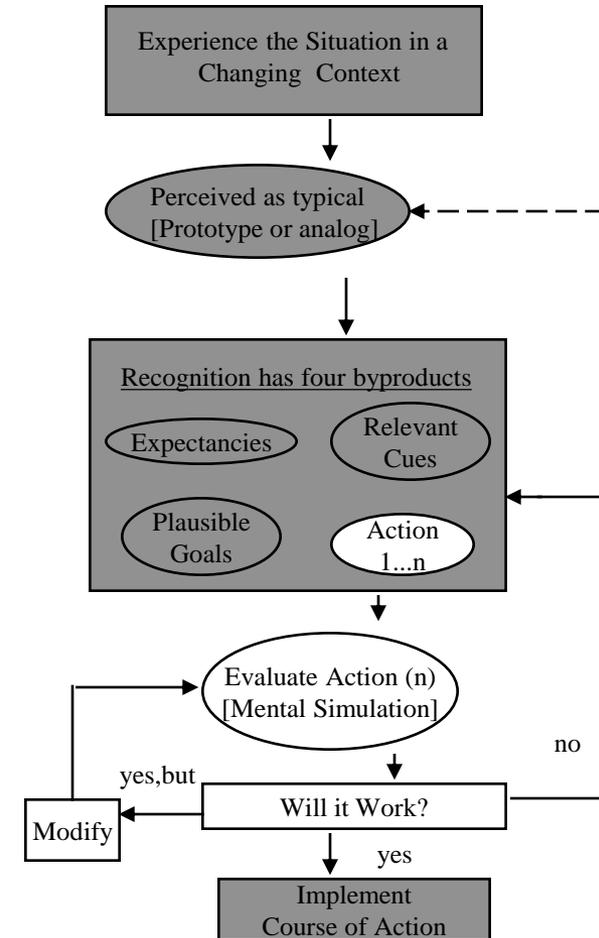

Variation 1  
Simple Match

Variation 2  
Diagnose the Situation

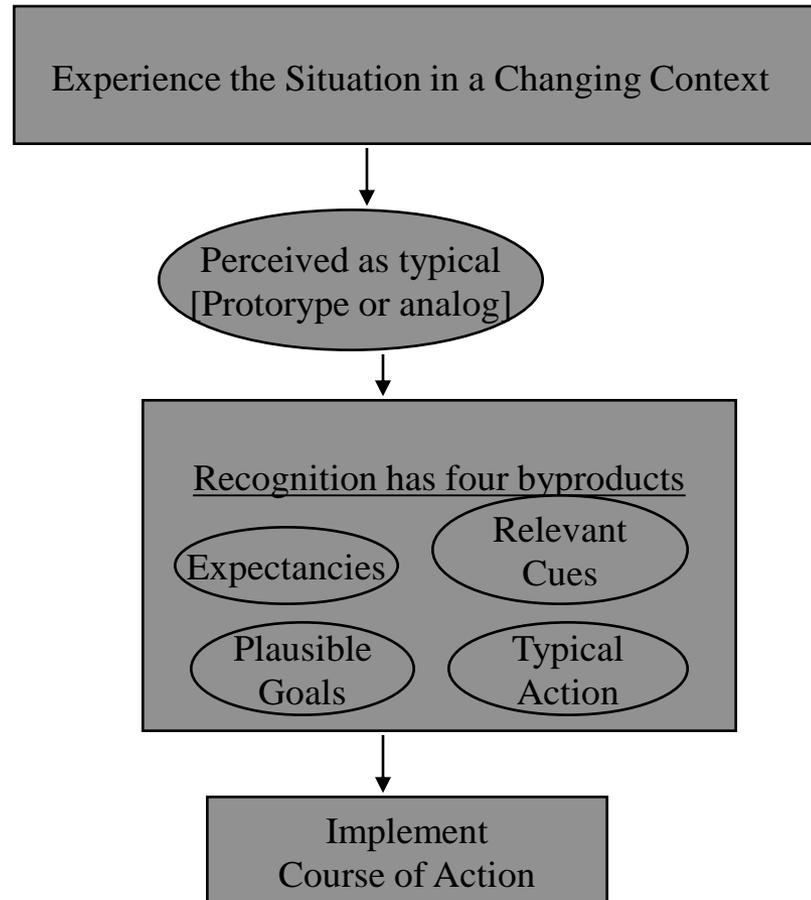

Variation 3  
Evaluate Course of Action

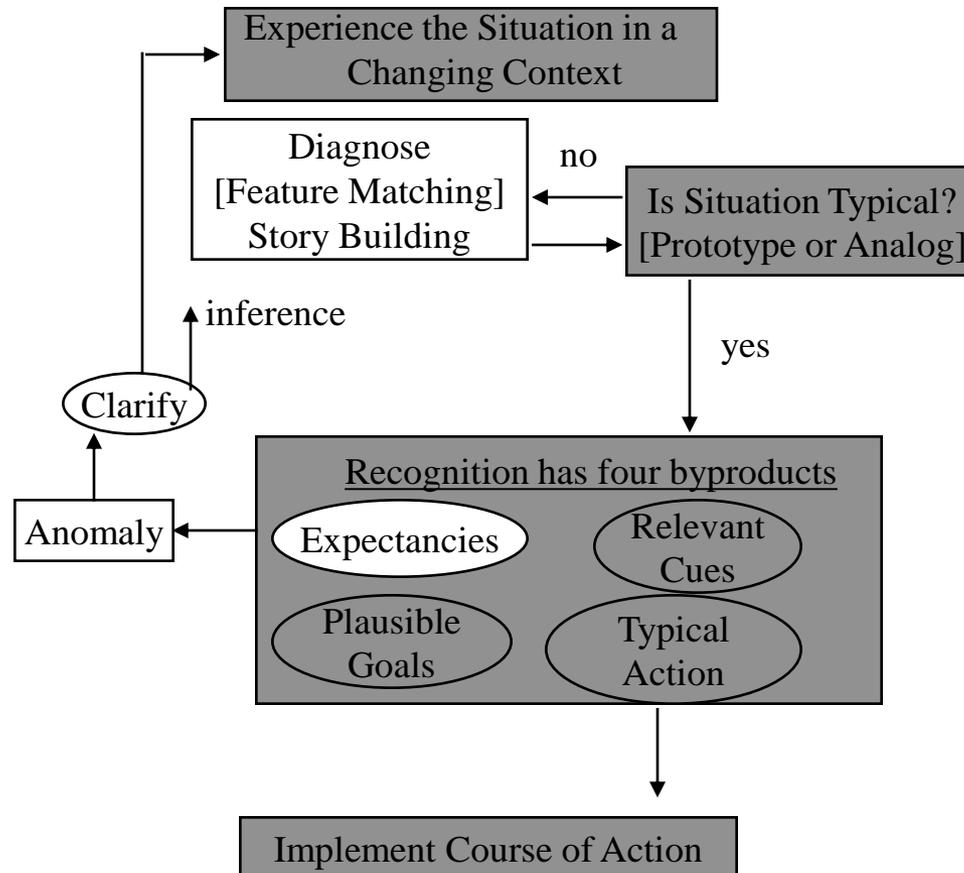

# Recognition-Primed Decision Model

## Variation 1 Simple Match

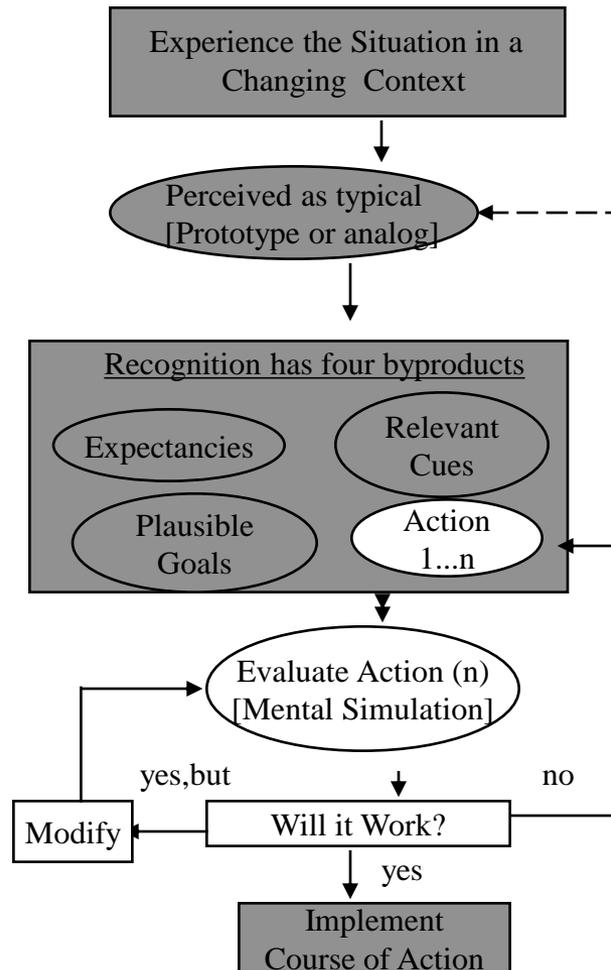

# Recognition-Primed Decision Model

## Variation 2 Diagnose the Situation

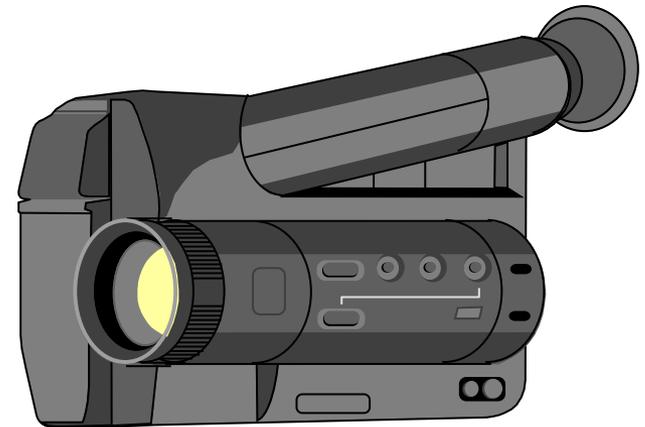

# Recognition-Primed Decision Model

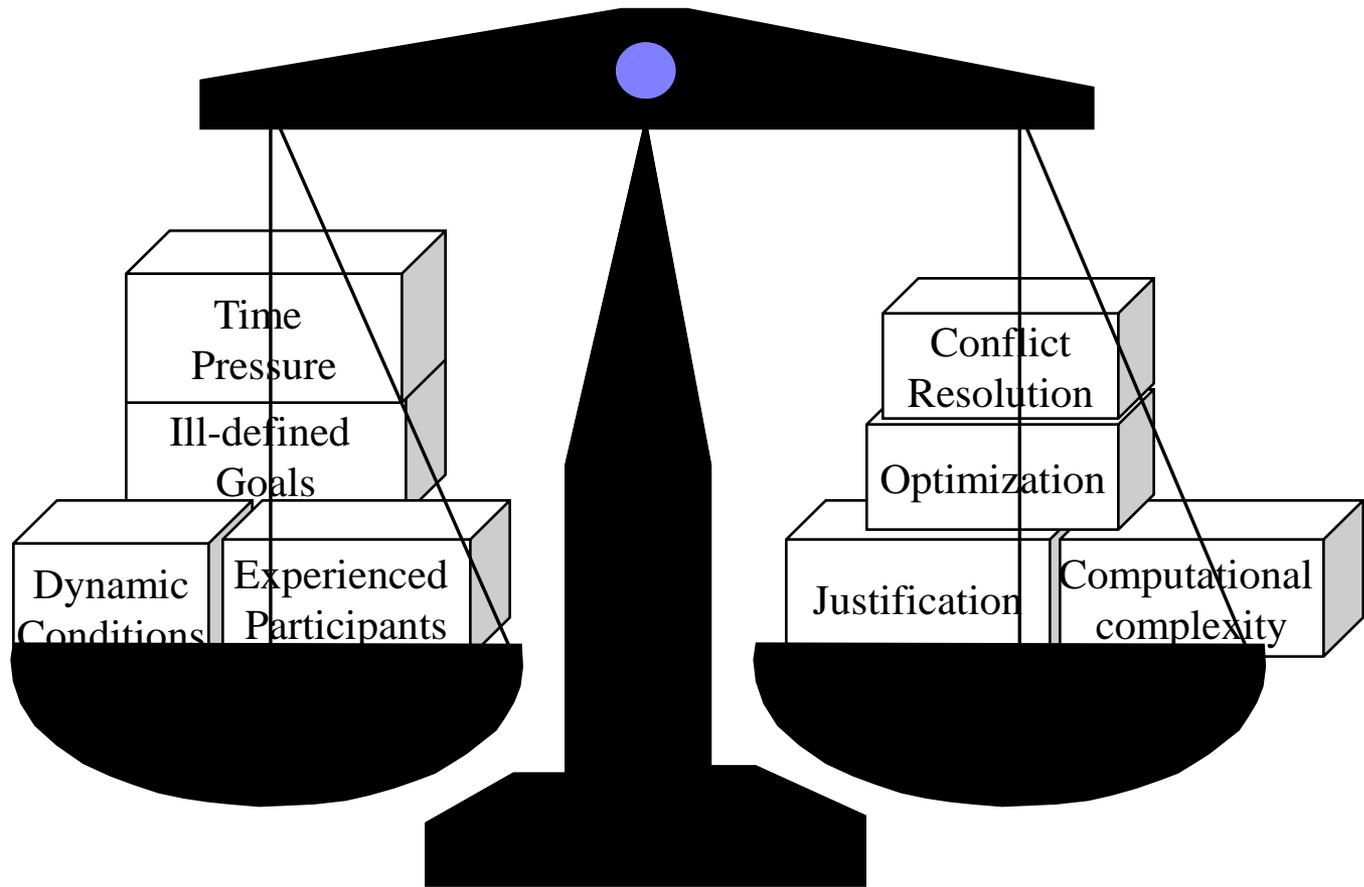

## Variation 3 Evaluate Course of Action

# Key Features of RPD Model

1. First option is usually workable  
Not random generation and selective retention
2. Serial generation/evaluation of options  
Not comparative evaluation
3. Satisficing  
Not optimizing
4. Evaluation through mental simulation  
Not MAUA or Decision Analysis
5. Focus on elaborating and improving options  
Not choosing between options
6. Focus on situation awareness  
Not CoAs
7. DM primed to act  
Not waiting to complete the analysis

Boundary Conditions for Different Strategies
