Foreword	xi
Preface	xiv
Editor’s Note	xix
Introduction. The Dawn of the Space Age	1
Arnold and von Kármán Form a Partnership	2
NACA and the Rocketeers Lay the Groundwork	3
Rocketeers Lead the Way	4
Wartime Provides the Momentum-Arnold and von Kármán Establish the Foundation	7
1. Before Sputnik: The Air Force Enters the Space Age, 1945–1957	13
Rand Proposes a World-Circling Spaceship	14
The Air Force Shuns Ballistic Missiles	16
Ballistic Missiles Receive New Life	21
The Air Force Studies Satellites	24
Satellites Receive New Life	27
Eisenhower Faces the Threat of Surprise Attack	29
Trevor Gardner Energizes the Missile Program	31
The Air Force Commits to the First Military Satellite	35
The Administration Commits to the First Civilian Satellite	38
The Air Force Reconsiders a “Civilian” Satellite	43
Retrenchment on the Eve of Sputnik	44
Retrospective From the Threshold of Space	47
2. From Eisenhower to Kennedy: The National Space Program and the Air Force’s Quest for the Military Space Mission, 1958–1961	50
Sputnik Creates a “National Crisis”	51
The Air Force Seizes the Initiative	53
The Government Organizes for Space	56
ARPA Takes Control	57
NASA Joins the Competition	60
NASA Takes Shape	65
Renewing the Quest for the Military Space Mission	68
The Air Force Seeks to Consolidate Its Position	80

The Military Space Mission Goes to the Air Force	86
The Air Force Rise to Military Space Preeminence	93
3. The Air Force in the Era of Apollo: A Dream Unfulfilled	96
The Air Force Position in the Spring of 1961	97
Seizing the Initiative	101
Confronting the McNamara Defense Department	112
The Air Force Plans and Programs for Space Leadership	116
Developing a “Partnership” with NASA	119
The Air Force Pursues a Dyna-Soar and a Space Station	120
Setting Course on a Manned Orbiting Laboratory	126
An End and a Beginning	133
4. From the Ground Up: The Path from Experiment to Operations	136
Artificial Earth Satellites Become Operational	137
Ground-Based Space Surveillance Comes of Age	161
A Fleet of Space Vehicles Sets the Course	162
Space Infrastructure Provides the Support	165
Organization Provides the Focus for Space	168
Vietnam Offers the First Military Space Test	169
The Military Space Community in Transition	171
5. Organizing for Space: The Air Force Commits to Space and an Operational Space Command	174
A Space Community in Disarray	176
The National Debate over Détente and Arms Control	178
The Air Force Commits to a Space Shuttle	180
The Growing Prominence of Space Systems in the Late 1970s	184
Soviet ASAT Testing Prompts Space Initiatives	188
ADCOM’s Demise and the Search for Space Consensus	193
The Organizational Prelude to an Air Force Space Command	196
The Reagan Administration’s Plan for Space in 1981	200
The Air Force Forms a Space Command	202
An Ending and a Point of Departure	207
6. From Star Wars to the Gulf War: The Air Force Moves to Create an Operational Capability for Space	209
Space Command Sets an Operational Agenda	211
A United States Space Command Joins the Space Community	217
The Growing Conflict Over Space Roles and Missions	219
The <i>Challenger</i> Disaster Creates an Uncertain Launch Future	221

The Response to the <i>Challenger</i> Shock Waves	228
General Piotrowski Champions Operational Space	230
The Blue Ribbon Panel Provides a Space Agenda	234
Air Force Space Command Gains the Space Launch Mission	238
The Decade in Retrospect	241
7. Coming of Age: Operation Desert Storm and Normalizing Military Space Operations	243
Operation Desert Shield—Preparation	245
Operation Desert Storm—Combat	255
Lessons Learned and Normalizing Military Space	259
8. An Air Force Vision for the Military Space Mission: A Roadmap to the 21st Century	270
A Generation of Leadership in Military Space Activities	270
An Air Force Vision for Another Generation of Space Leadership	275
Appendices	285
Notes	299
Glossary	342
Bibliography	346
Index	369
