General Information

Internet Resources

Arms Control Association.

Available online at: <http://www.armscontrol.org/>

This is an authoritative source on arms control. Provides country resources, fact sheets, treaties and current news articles on various programs and policies concerning nuclear weapons.

British American Security Information Council (BASIC).

Available online at: <http://www.basicint.org/>

BASIC is an independent research organization that analyzes government policies and promotes public awareness of defense, disarmament, military strategy and nuclear policies. Offers information on nuclear-related projects, publications, and news such as NATO's nuclear posture, arms control treaties and Iran's nuclear program.

Commission on the Prevention of Weapons of Mass Destruction Proliferation and Terrorism.

Available online at: <http://www.preventwmd.org/>

Established by House Resolution 1, the Commission addresses the grave threat that the proliferation of weapons of mass destruction poses to our country. Provides access to hearings, publications and news articles.

Federal Emergency Management Agency (FEMA)-Disaster Information on Nuclear Blast.

Available online at: <http://www.fema.gov/hazard/terrorism/nuclear/index.shtm>

Provides information on effects of a nuclear blast and how to prepare for it.

First Response. Maxwell AFB, AL.

Available online at: <http://c21.maxwell.af.mil/frstresp.htm>

Provides links to vast amounts of military resources on counterproliferation, prevention and preparedness.

Fox News. Weapons of Mass Destruction Handbook.

Available online at: <http://www.foxnews.com/story/0,2933,76887,00.html>

This website presents an overview of the general threat of biological, chemical, nuclear and radiological weapons, along with much more specific and detailed information on the history, proliferation, delivery mechanisms and treatment/prevention options for such weapons.

Henry L. Stimson Center.

Available online at: <http://www.stimson.org/topics/nuclear-weapons/>

Site offers latest information on nuclear weapons such as: Arms control, nuclear disarmament, and non-proliferation. Includes briefings, reports and analysis.

International Atomic Energy Agency (IAEA).

Available online at: <http://www.iaea.org/>

The IAEA is the world's nuclear inspectorate, with more than four decades of verification experience. The Agency works with its Member States and multiple partners worldwide to promote safe, secure and peaceful nuclear technologies.

Iran: Nuclear Issues. February 2010. 18 p.

Available online at: <http://www.au.af.mil/au/aul/bibs/irannuclear2010.htm>

This Fairchild Research and Information Center bibliography provides lists of internet resources, books, documents, and magazine journal articles on the topic with numerous links to full-text.

James Martin Center of Nonproliferation Studies (CNS). Monterey, CA, Monterey Institute of International Studies.

Available online at: <http://cns.miis.edu/>

The CNS strives to combat the spread of weapons of mass destruction (WMD) by training the next generation of nonproliferation specialists and disseminating timely information and analysis. Also provides access to the journal Nonproliferation Review and provides links and resources to overview of NBC weapons, WMD use and conflict, country profiles of WMD capabilities, delivery systems and range/payload of deployed missiles.

Medalia, Jonathan E. Detection of Nuclear Weapons and Materials: Science, Technologies, Observations.

Washington, Congressional Research Service, June 4, 2010. 21 p.

Available online at: <http://fpc.state.gov/documents/organization/143903.pdf>

North Korea: Nuclear Issues. May 2009. 26 p.

Available online at: <http://www.au.af.mil/au/aul/bibs/nkoreanuclear.htm>

This Fairchild Research and Information Center bibliography provides lists of internet resources, books, documents, and magazine journal articles on the topic with numerous links to electronic full-text.

Nuclear Control Institute.

Available online at: <http://www.nci.org/>

Latest news articles and publication on Nuclear issues.

Nuclear Operations: Air Force Doctrine Document 2-12. Washington, Department of the Air Force, 2009. 36 p.

Available online at: http://www.dtic.mil/doctrine/jel/service_pubs/afdd2_12.pdf

Chapter 1, "Fundamentals of Nuclear Operations"
Chapter 2, "Command and Control of Nuclear Operations".
Chapter 3, "Planning and Support Considerations".
Chapter 4, "Surety".
Chapter 5, "Training"

Nuclear Threat Initiative.

Available online at: http://www.nti.org/e_research/e_index.html

Searchable online resource that allows access to the facts about the threats from nuclear, biological and chemical weapons, missile development programs and policies and terrorist activities.

Pakistan. July 2009. 42 p.

Available online at: <http://www.au.af.mil/au/aul/bibs/pakistan09.htm>

This Fairchild Research and Information Center bibliography provides lists of internet resources, books, documents, and magazine journal articles on the topic with many links to full-text. There are numerous items on nuclear weapons and Pakistan's nuclear issues under the "Defense and Security" and the "Foreign Relations" sections.

Skinner, Anthony R. **Combating WMD Is It Really a Priority?** Carlisle Barracks, PA, U.S. Army War College, 2008. 22 p.

Available online at: <http://handle.dtic.mil/100.2/ADA478296>

This paper examines the Combating WMD Strategy and the current DoD capabilities to support national strategy. Capability gaps are identified and recommendations are included.

U.S. Nuclear Regulatory Commission: Fact Sheets and Brochures.

Available online at: <http://www.nrc.gov/reading-rm/doc-collections/fact-sheets/>

Fact Sheets and backgrounders on nuclear security and emergency preparedness.

United States Air Force Counterproliferation Center.

Available online at: <http://cpc.au.af.mil/>

Provides assistance to Counterproliferation research and education. Site provides information under separate sections for Nuclear, Radiological, Biological, and Chemical.

United States Department of State - Bureau of International Security and Nonproliferation (ISN).

Available online at: <http://www.state.gov/t/isn/>

The Bureau of International Security and Nonproliferation (ISN), headed by acting Assistant Secretary Francis C. Record is responsible for managing a broad range of nonproliferation, counterproliferation and arms control functions. ISN leads U.S. efforts to prevent the spread of weapons of mass destruction (nuclear, chemical, and biological weapons) and their delivery systems.

United States Nuclear Regulatory Commission: Fact Sheet on Dirty Bombs.

Available online at: <http://www.nrc.gov/reading-rm/doc-collections/fact-sheets/dirty-bombs-bg.html>

General information on dirty bombs is provided.

VERTIC - Verification Research, Training and Information Center.

Available online at: <http://www.vertic.org/>

VERTIC maintains a watching brief over all developments in the verification and monitoring of arms control and disarmament agreements and promotes the development and implementation of effective verification measures.

Kugler, Richard L. **An Extended Deterrence Regime to Counter Iranian Nuclear Weapons: Issues and Options.** Washington, Center for Technology and National Security Policy, National Defense University, 2009. 50 p.
Analyzes the idea of creating a U.S.-led "extended deterrence regime" to respond to potential Iranian acquisition of nuclear weapons and missiles. It does not focus on how to prevent Iran from becoming a nuclear-armed power. Instead it addresses how the U.S. Government can act to deter Iran in a future setting where Iran already possesses these weapons and is trying to employ them to geopolitical advantage.

U.S. Nuclear Weapons Policy. New York, Council on Foreign Relations, 2009. 125 p.

This report notes that in the near term nuclear weapons will remain a fundamental element of U.S. national security. It emphasizes the importance of maintaining a safe, secure, and reliable deterrent nuclear force and makes recommendations on this front. It also offers measures to advance important goals such as preventing nuclear terrorism and bolstering the nuclear nonproliferation regime.

While several nations in the region already have small nuclear research reactors, and Israel has used its research reactor to produce enough plutonium for 100 to 180 nuclear weapons, the only Middle East nation to build a nuclear power plant has been Iran. Iran could also strike back with a number of asymmetrical responses, none easy to counter including mining or otherwise shutting down the Strait of Hormuz, a critical chokepoint for oil transport in the Persian Gulf; attacks on Israel, either directly or through surrogate forces, that could bring Arab publics to its side; attacks on US forces in Iraq through Shiite militias; and attacks on American commercial and military sites around the world.

Democracy and Nuclear Arms Control -- Destiny or Ambiguity? **Security Studies** 17:810-854 October 2008.
Is there a particularly democratic way of dealing with nuclear arms control? Against the background of democratic peace (DP) theory, and using Immanuel Kant's writing as a starting point, this article argues that democracies should indeed develop a preference for arms control, but that Liberalism as well as the nature of nuclear weapons opens the possibility for contingent developments within a DP framework.

Reviewing the Nuclear Nonproliferation Treaty (NPT). Carlisle, PA, Strategic Studies Institute, U.S. Army War College, 2010. 447 p.

"As currently interpreted, it is difficult to see why the Nuclear Nonproliferation Treaty (NPT) warrants much support as a nonproliferation convention. Most foreign ministries, including that of Iran and the United States, insist that Article IV of the NPT recognizes the 'inalienable right' of all states to develop 'peaceful nuclear energy'. This includes money-losing activities, such as nuclear fuel reprocessing, which can bring countries to the very brink of acquiring nuclear weapons. If the NPT is intended to ensure that states share peaceful "benefits" of nuclear energy and to prevent the spread of nuclear bomb making technologies, it is difficult to see how it can accomplish either if the interpretation identified above is correct." -P. 3

Sirak, Michael C. *Nuclear Force Revival*. **Air Force Magazine** 92:24-30 February 2009.

With the release last October of the strategic planning document "Reinvigorating the Air Force Nuclear Enterprise," USAF unveiled a comprehensive plan to strengthen its handling of ICBM forces and nuclear-capable bombers. The service says that implementing this plan is top priority. Underway are numerous projects including the establishment of a new major command, the USAF Global Strike Command.
